

Madeley Academy

Summer 2021 Risk Assessment & Staff Guidance

**Version 14
2 July 2021**

Risk Assessment Madeley Academy – COVID - 19

Location / Site	Insert location and site where activity taking place
Castlefields Way Madeley Telford TF7 5FB	
Activity / Procedure	Insert name/type of activity or procedure being assessed
Review of Risk Assessment based on Spring Term opening from 8 March 2021	
Assessment date	Insert date when assessment is being carried out
1 July 2021	

Identify people at risk	YES or NO
Employees	YES
Children	YES
Visitors	YES
Contractors	YES

Extract from Schools coronavirus (COVID-19) operational guidance May 2021

“System of controls

PHE advice remains that the way to control this virus is with the system of controls, even with the current new variants.

In this section where something is essential for public health reasons, as advised by Public Health England (PHE), we have said ‘must’. Where there is a legal requirement we have made that clear. This guidance does not create any new legal obligations.

This is the set of actions you must take. They are grouped into ‘prevention’ and ‘response to any infection’. If you follow the system of controls, you will effectively reduce risks in your setting and create an inherently safer environment. These additional measures will be reviewed in partnership with health experts to decide whether the evidence suggests that these measures can be eased during the summer term.

Prevention

You must always:

1. Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school.
2. Ensure face coverings are used in recommended circumstances.
3. Ensure everyone is advised to clean their hands thoroughly and more often than usual.
4. Ensure good respiratory hygiene for everyone by promoting the ‘catch it, bin it, kill it’ approach.
5. Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
6. Consider how to minimise contact across the site and maintain social distancing wherever possible.
7. Keep occupied spaces well ventilated.

In specific circumstances:

8. Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary.
9. Promote and engage in asymptomatic testing, where available.”

Identify hazard		Record the hazard that could cause harm or injury – add appropriate detail about the type and location of hazards	
Lack of social distancing in the classroom and other locations resulting in direct transmission of the virus			
Existing level of risk		Consider current level of risk	
HIGH	MEDIUM	LOW	NEGLIGIBLE
Control measures		List your control measures required to reduce risk – add appropriate detail about the type and location of controls	
<ol style="list-style-type: none"> 1. Focused Risk Assessments by subject areas take account of bespoke measures in subject areas. 2. Disinfectant, hand gel and blue roll at each teacher station for IT equipment and teacher area. 3. Staff maintain social distancing between each other and students. 4. Staff use a judgement of 2 metres when teaching where possible. 5. Staff use personal judgement as to the wearing of a face covering in the classroom. 6. Limit the amount of equipment students bring into school each day. 7. Students and teachers can take books and other shared resources home, although unnecessary sharing should be avoided. 8. Staff ventilate the room wherever possible to increase the flow of fresh air. 9. Mechanical building ventilation remains operational. 10. Students enter the building with supervisory staff present at their designated entrance and time. 11. Students wash hands or access hand sanitiser on staggered entry and return from break. 12. Students continue in year group “bubbles” unless visiting specialist venues. 13. Teachers move to bubbles unless teaching in specialist venues. 14. Students observe social distancing from staff where possible including not touching staff belongings. 15. Explicit, informing of the need to wash hands or sanitise hands. 16. Where possible, desks facing forwards and students not facing each other. 17. Students keep personal items and stationery in their Academy Bag, which is not shared. 18. Persons presenting symptoms are identified and safely managed by alerting SLT and the nurse. 19. The Academy Nurse or deputising staff wear PPE when interfacing with a symptomatic individual. 20. Symptomatic cases move outside by Gatehouse until collection avoiding pedestrians. 21. If a test is positive, the Academy will work with the Health Protection Hub to define procedures. 22. Staff vigilant of students with SEND, those vulnerable or known to have behavioural conditions as they may have an impaired ability to communicate if feeling unwell. 23. Students leave by their designated exit and are escorted by their teacher at departure time. 24. Consideration and respect of personal spaces in offices.

Student or staff becomes ill with a new, continuous cough or a high temperature, or has a loss of, or change in, their normal sense of taste or smell (anosmia)				
Existing level of risk		Consider current level of risk		
HIGH	MEDIUM	LOW	NEGLIGIBLE	
Control measures		List your control measures required to reduce risk – add appropriate detail about the type and location of controls		
<ol style="list-style-type: none"> 1. If anyone in the school becomes unwell with a new and persistent cough or a high temperature, or has a loss of or change in, their normal sense of taste or smell (anosmia), they must be sent home and advised to follow guidance for households with possible or confirmed coronavirus (COVID-19) infection and should arrange to have a test to see if they have coronavirus (COVID-19). 2. The Academy Nurse, deputising staff and SLT member is called on telephone or radio. 3. Persons presenting symptoms communicate via the camera and microphone by the Medical Room. 4. The Academy Nurse or deputising staff wear PPE when interfacing with a symptomatic individual. 5. Symptomatic cases move outside by Gatehouse until collection avoiding pedestrians. 6. In inclement weather a socially distanced and safe venue will be used. 7. Isolation will be invoked for close contacts following a positive result. 8. If test is positive, Academy informs Health Protection Hub to alert of Academy/community case. 9. If a member of staff has helped someone with symptoms, they do not need to go home unless they develop symptoms themselves or the child subsequently tests positive. They should wash their hands thoroughly for 20 seconds after any contact with someone who is unwell. Cleaning surfaces in the area with normal household disinfectant after someone with symptoms has left will reduce the risk of passing the infection on to other people. 10. When a student or staff member develops symptoms they are sent home, book a test and self-isolate for 10 days if positive. Household members also must self-isolate for 10 days. 11. Staff or students get a test if they display symptoms of coronavirus. 12. Where a student or staff member tests negative, they can return to their setting and household members can end their self-isolation if well enough to do so. 13. Where the child, young person or staff member tests positive, the Health Protection Hub will provide definitive advice on who must be sent home. 14. As part of the NHS Test and Trace process, if other cases are detected within the cohort or in the wider setting, health protection teams will conduct a rapid investigation and will advise schools and other settings on the most appropriate action to take. In some cases a larger number of other children, young people may be asked to self-isolate at home as a precautionary measure. Where settings are observing guidance on infection prevention and control, which will reduce risk of transmission, closure of the whole setting will not generally be necessary.

Figure G explanatory notes

1. VTC – All rooms have access to disinfectant, blue roll, tissues and hand gel
2. (2 – 27) Either fixed hand gel and tissue access or hand sanitiser spray from colleagues at key times.
3. Every classroom - disinfectant, blue roll, tissues, hand gel on teacher desk
4. V1, V2, Construction, ICT, H & C, H & B, PD, A & D, PA, Gym, PE areas have specialised Risk Assessments and additional cleaning products between lessons. These are negotiated between specialist areas and Site Manager, Matt Lumby.
 Additional cleaning materials comprising of the following items:
 - Multiple disinfectant spray bottles
 - Multiple blue rolls
 - Hand gel

Common Room Format

Recommended room fill sequence and reverse when leaving area
 Staff provided with resources to clean their own desk and IT equipment
 Disinfectant spray to be applied to blue roll and then applied to keyboard rather than spraying directly onto the keyboard
 Where possible students face the front
 Where possible additional furniture has been removed
 Where possible teacher zones have been marked on the floor for exclusive access
 Keep rooms ventilated
 Call Reception for support for any classroom issues and a daytime supervisor will be called
 Disinfectant spray can be sprayed directly onto hard surfaces, but best avoided to control overspray
 Staff oversee the use of wiping down surfaces and control the use of common disinfectant

Sanitisation Stations – Always subject to review

To support measures to control the virus, wall mounted sanitisation stations are available with tissues, and hand sanitiser gel. Students are directed to use the alcohol hand gel on corridors.

Posters reminding students of their requirement to sanitise (or wash) their hands and use tissues will be profiled throughout the building.

Daytime Cleaning Assistants check on stock levels. Staff to report any stock issues to 701 at any time leaving a recorded message if necessary.

Disinfectant – Always subject to review

Selgiene disinfectant is used in the Academy. This has been decanted and diluted in spray bottles in the classrooms and is used for hard surfaces. Selgiene is our preference based on current volumes required and methods of disinfecting the Academy.

Staff are advised to spray onto blue roll before use and when disinfecting ICT equipment. Some areas have agreed alternative cleaning in cooperation the Site Manager, Matt Lumby.

All COSHH sheets available via Matt Lumby.

Physical Modifications

Requests are invited from staff for replacement on your witness of wear and tear or as you have an area of need.

Signage

Signage and digital signage promoting hygiene and management of movement has been printed and in plentiful quantities for use in the Academy. This includes detailing external doors in the VTC that will be used for outer classrooms, rather than using internal routes. Staff and students observe the signage and remind students to do the same. Additional signage is always available on request.

Toilets

Frequent cleaning of toilets is part of the daily schedule. Any issues regarding toilet hygiene should be reported immediately to 701. A Cleaning Assistant will be called. Always leave a message if necessary. Signage reminding all persons to wash their hands is in place.

More than one person may use toilet facilities. More than one person can occupy a toilet, but tape remains in place to socially distance persons where possible including sinks.

All cubicle and accessible toilets are in use and are open.

Students may use toilet facilities in the Academy on demand and where required geographically. Frequent monitoring by Cleaning Assistants is in place all day. Any issues to 701.

Modification of Corridors

Keep left markings remain to assist with social distancing on corridors. Tape markings assist in classrooms and non-classroom areas.

Teaching Room Sanitisation Tables for Staff

Every classroom and teaching location has **blue roll**, **disinfectant spray**, **alcohol hand gel** and **tissues** at the front of the class. There are sanitising arrangements in use throughout the Academy where required. If there is a need to replace, restock or guidance on use, please contact 701 and a Cleaning Assistant will be called. COSHH data sheets are available from Matt Lumby for all products in use. Staff in the Academy are asked assist with identifying any issues and reporting them to 701 immediately so that remedial action can be taken to replenish any stock.

Restaurant Queues

Students managed by staff queue in a single file and respectful of personal space in their year bubble. Menu options have been shared with students and staff and are available to view on the website.

Modifications to Entrances

Year groups will enter the building via entrances A, B, C, D and E at staggered intervals. Entrances are managed by Daytime Cleaning Assistants. Hand spray is offered to students on entry to the building. Students go straight to timetabled lesson and sit down in class.

Managed Access to Reception

Acrylic protection surrounds the Receptionist on duty. Parents, carers communicate with Reception via the video link at the gate, telephone or email. Appointments must be made to visit the Academy as necessary. Strict adherence to protocols must be taken when visitors come onto site for appointments. Visitors recommended to wear face coverings whilst on site.

Modification to Internal Corridors to Reception Area

Staff maintain social distancing when entering the Reception area.

VTC One Way System

A one way system continues to be used until further notice. Access from outside doors to be encouraged and protocols on one way movement in place on corridor. Movement to breakfast and lunch also require movement out of the building and return through front entrances.
